

Children's Champions Speakers' Bureau *Advocacy Toolkit Presentations*

Help spread the word about the importance of early learning and development.

The "Children's Champion Speakers' Bureau" and "Advocacy Toolkit Presentations" were created to help us increase public awareness about the importance of investing in Arizona's children. Through a series of fun props, children's health issues will be explained so that audiences will be inspired to take collective action on behalf of the youngest residents of our state. Because of its simplicity, the Advocacy Toolkit can be adapted for a variety of audiences, including parents, church groups, community organizations or clubs, and business leaders.

What it does:

- Increases community awareness about what children need in order to be healthy, safe, and ready for school
- Shows the public how they can become advocates for children
- Engages a variety of audiences with simple and effective visuals

What it contains:

- Props to discuss current health and wellness issues that children face
- Scripts in both English and Spanish, with different versions depending on the audience
- A list of ideas on how to take action
- Resource list for parents of children ages 0-5
- The Children's Bill of Rights
- Feedback/Tracking sheets for presenters and audiences
